

# SHANDONG PROVINCE

Area: 157,800 sq km

Population: 91.25 million

Longitude: 114°36'-122°43'E Latitude: 34°25'-38°23'N

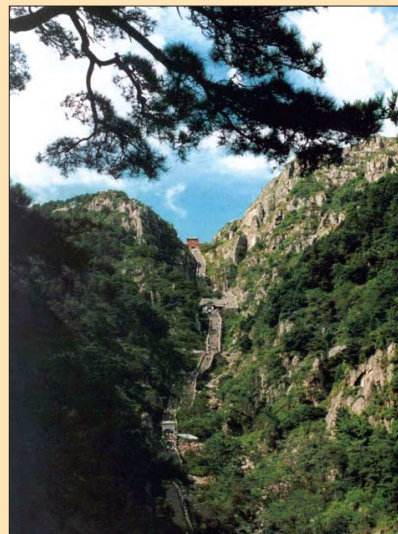

Location: Lower reaches of the Yellow River in the eastern coastal area of China

Climate: Warm temperate monsoon climate.

- Average annual temperature: 11-14°C
- Average annual precipitation: 550-950 mm

Shandong Province is made up of a peninsula and an inland part. The Shandong Peninsula rises between the Yellow Sea and the Bohai Sea, facing the Liaodong Peninsula across the Bohai Strait. It has a coastline of 3,024.4 km.

With beautiful natural landscapes and numerous historical and cultural relics, Shandong has rich tourist resources. It offers a string of tourist attractions, including Mount Taishan and the Temple of Confucius, which have been inscribed on the World Natural Heritage List and the World Cultural Heritage List respectively. Weifang, known as "Home of Kites," attracts numerous visitors annually.
