

QINGHAI PROVINCE

Area: 721,200 sq km

Population: 5.18 million

Longitude: 89°35' to 103°04' E Latitude: 31°39' to 39°19' N

Location: Northeastern part of the Qinghai-Tibet Plateau in west China

Average elevation: 3,000 m

Climate: Influenced by its elevation, terrain, latitude and atmospheric circulation, Qinghai has a unique kind of climate—the plateau continental climate, with long winters, but not cold, and short summers, but not hot. Different regions vary in temperature. Vertically, the temperature also changes greatly. Precipitation always happens in a certain season and its distribution also differs remarkably in different regions.

• Average annual temperature: -5.6-8.7°C

The Qinghai Lake Bird Island

- Average annual precipitation of the southeastern part: 450 to 600 mm

Qinghai is named the Qinghai Lake—the largest inland salt lake. It is also the cradle of the Yangtze River, the Yellow River and the Lancangjiang River.

Having the characteristics of the Qinghai-Tibet Plateau, natural sceneries of Qinghai are imposing, extraordinary, beautiful and magnificent. The Qinghai Lake, also known as the "Kingdom of Birds", is a national nature reserve and has been inscribed into the list of the Convention on Wetlands. The Ta'er Lamasery in Huangzhong County is one of the six famous temples of Tibetan Buddhism.
